

Triennial assessment results 2026

Meet our team

- Curt Feilmeier - Principal
- Christina Wahlmeier - School Nurse
- Katie O'Neal - Assistant Principal
- Roxanne Richter - School Physical Education Teacher
- Janice Bosland - School Lunch Program Director
- Holly Steinbach - School Parent
- Sara Sharp - School Parent

Policy compliance results

Our Local Wellness Policy Triennial Assessment results state that our school is in compliance with the goals and assessment. We strive to create a school for our students to have a nutritious lunch and snacks, healthy eating habits, physical education, recess, community activities, and family events. We try to make our school a safe place for all.

Wellness policy goals

1. Nutrition education/promotion - Nutrition education is met with education about healthy eating habits, a well balanced diet and locally sourced foods from farmers.
2. Physical activity - all students Pk-8th grade receive physical education classes, have recess and are encouraged to play sports outside of school. All students are given opportunities to involve their parents, grandparents and their communities in physical activities like the annual Pumpkin Run, the Thanksgiving Turkey Trot, walk/bike to school and roller skating events.

3. Other goals for student well-being - all students PK- 8th grade attend daily Mass, receive education about their bodies, healthy eating habits, anti-drug and alcohol programs and the importance of healthy bodies.

Key achievements

1. Our staff created challenges to form better eating, drinking, and sleep habits. Students were involved in cheering on their teachers to make better choices for beverages during the day, getting more sleep at night and making better choices for their lunch plates.
2. Our school held walk/bike to school events to promote healthy physical activity habits, as well as promoting other family activities to promote physically fit people.
3. Our school promoted community held events for education about food, environment and recycling trash. This helped kids understand the importance of taking care of themselves and our planet.

Next Steps

Our LWP Committee will continue to meet quarterly. We assess the current policy, make suggestions for events or classes for staff and students. We will make changes as needed and continue to support our staff, students, parents and community in creating a place for all to be healthier people.

Students roller skating in PE class, followed by an event for parents, siblings and students to join in the fun.

Students eat a healthy lunch of walking tacos, tater tots, peaches, milk and a sherbet for dessert.

For a good physical activity, students either walk or bike to school.
